

ETHAN ALLEN GATEWAY STREETScape PROJECT

The eastern gateway into Takoma Park is getting a facelift, and designers have worked to pack a lot of improvements into this 1/4 mile of roadway along Ethan Allen Avenue (MD 410) as it crosses New Hampshire Avenue (MD 650). Here are some of the project benefits:

25 existing Pepco lights upgraded with LED fixtures.

6 new decorative light poles added with LED fixtures.

85 ft reduction in the net crosswalk lengths at the New Hampshire Avenue intersection, because...

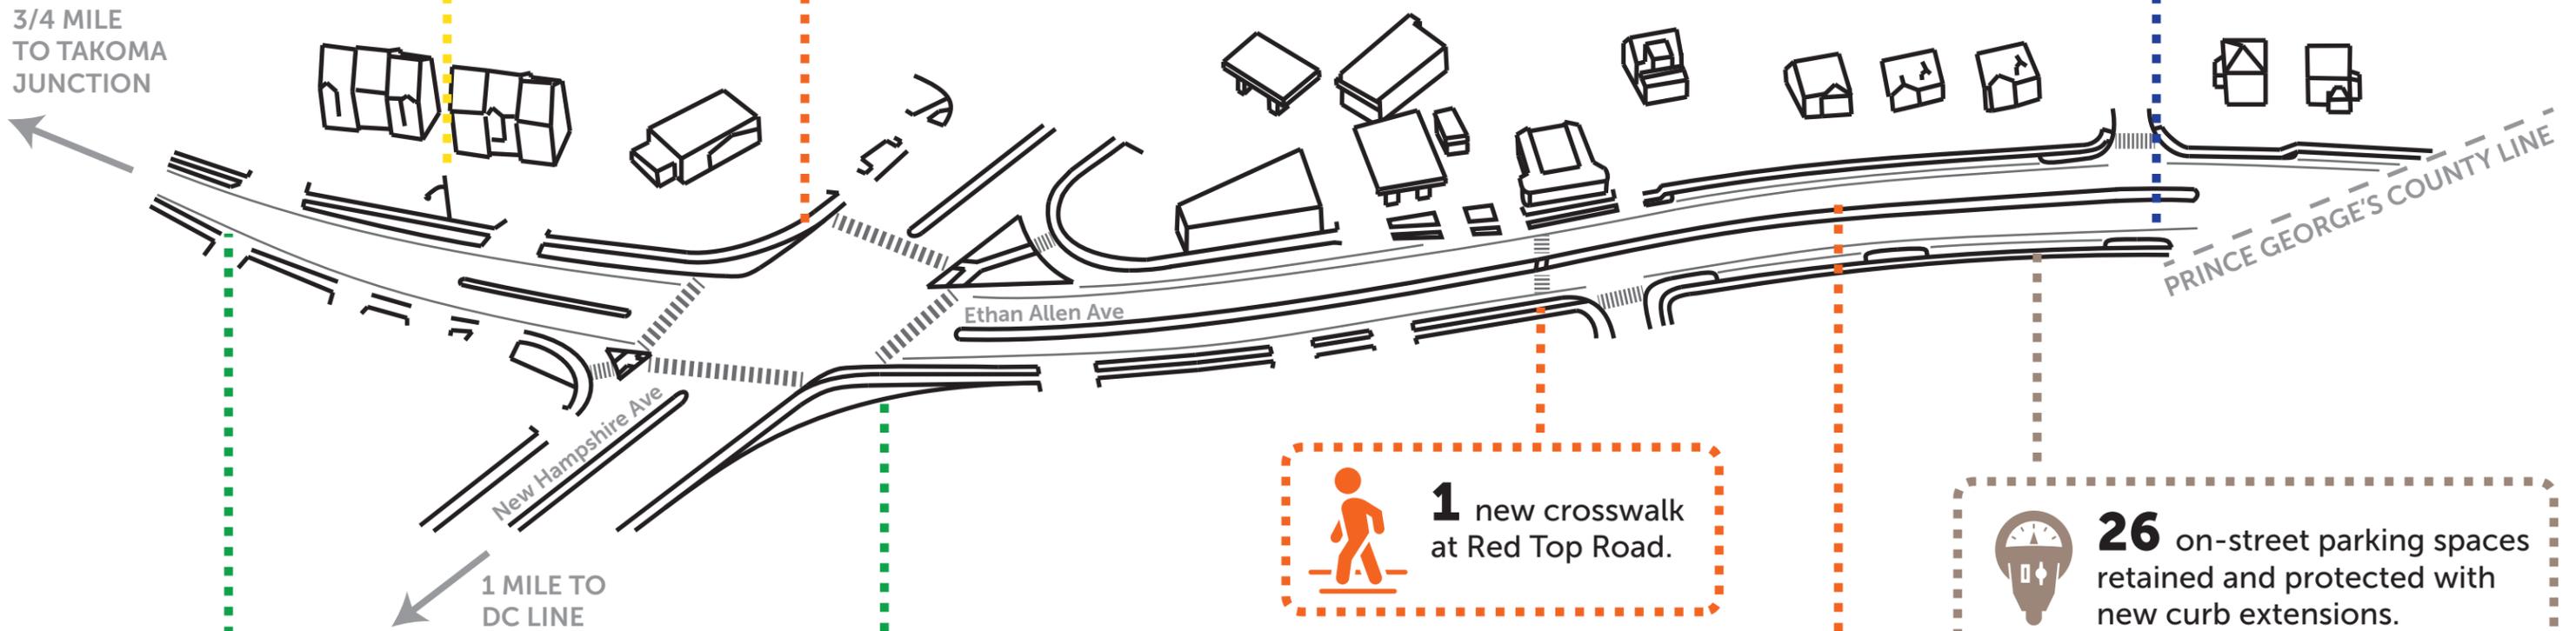

2 right turn slip lanes (aka "pork chops") eliminated from the intersection.

0.21 acres of storm water drainage treated in two new bioretention facilities.

3/4 MILE TO TAKOMA JUNCTION

1 new crosswalk at Red Top Road.

26 on-street parking spaces retained and protected with new curb extensions.

1/4 mile of bike lanes.

6 new bike racks.

12 new ornamental and shade trees.

13,723 sq ft of impervious area replaced with greenery. That's larger than two standard residential lots!

600+ linear feet of new sidewalk.

1000+ linear feet of existing sidewalk widened and/or buffered from the roadway.
